Entrance to the Nursery of Jacob Schulz Co. and Home of G.E. Schulz

Close by the city of Louisville, on the Bardstown Road, is located Schulz's Dahlia Farm. It is an ideal countryside, beautifully situated with surroundings well calculated to emphasize the importance of the Jacob Schulz Company in their nursery operations. They are florists, nurserymen and landscape architects.

The beautiful home illustrated above is where the President, Mr. G. E. Schulz lives. The farm office is back of the house. The business office is located at 550 S. Fourth Ave., Louisville, Ky.

The field scenes of Dahlias and Irises, reproduced from photographs, indicate something of the extent of their nursery growing operations. They have made their reputation along lines of quality and service. This catalog is a complete presentation of their business in plain and honest terms.

The Dahlia Beautiful
History of the Dahlia

Dahlias are natives of Mexico, where they grow wild, and in single form. Their earliest history dates back to 1657, when the plant was called "Acoctli" by the Aztec Indians. Later the name was changed to Georgiana, after Professor Georgii of St. Petersburg, which name is still used in some of the foreign catalogs. It was again changed to Dahlia, in honor of Dr. Andrew Dahl, a Swedish botanist.

The Dahlia was first cultivated in the Botanical Gardens, at Madrid, Spain, in 1789, and at about the same time was introduced into England by the Marchioness of Butte.

Dahlia variabilis, from which most of the common or Show Dahlias have originated, was single in its wild state. The first double forms appeared in 1814 and were credited to M. Donkelaar of the Botanical Gardens of Belgium. The Pompon form appeared about 1838, followed by the Decorative, the origin of which is not clearly defined, but probably dates back some forty or fifty years. Dahlia Juarezi, the first Cactus Dahlia, was discovered in Juxphaor, Mexico, in 1872, by J. T. Vanderburg, and named Juarezi in honor of President Juarez of Mexico. It was sent by Vanderburg to an English florist, who exhibited it in England in 1880.

Dahlia tubers or bulbs were used as a food in Mexico, and at one time in France. It was attempted to introduce them into cultivation in all Europe as a food for either man or cattle, but the taste was found nauseous to European palates.

The Culture of the Dahlia

Success will follow if you observe these instructions:

Location. An open sunny location favors Dahlias and induces them to do their best; though they will succeed under many adverse conditions. They do well on high or low lands, hillsides or level. Many varieties do as well in partial shade as they do in full sun.

Dahlias grow equally well on any kind of soil—sand, gravel, heavy or light loam. In sand and gravel they form a short, sturdy compact plant, and in heavy loam they grow tall and rank and blossom about a week later than those planted at the same time in sandy soil.

Preparation. Dahlias need an opportunity for rapid expansion and an easy path for the tiny rootlets, therefore, thoroughly cultivate the soil by plowing or spading eight to ten inches deep, pulverize and thoroughly work over. Exceptional results may be obtained by plowing or spading in the fall or very early in the spring, then plowing or spading again just before planting.

Fertilizer. Fertilization is one of the most important factors in Dahlia culture. You can use manure (either horse, cow, sheep or hen), or chemicals, or any commercial fertilizer rich in nitrogen, potash and phosphoric acid. Fish and potash, acid phosphate in the form of bone flour, or sulphate of potash, are also effective. The manure restores the properties necessary, making the soil light and mellow and keeping it from being heavy and caking, while lime has the same tendency and keeps the soil sweet.

An application of manure (either in liquid or ordinary form) several times throughout the growing season proves very beneficial, furnishing new material for the growing plants and insuring you the very best results.

Time of Planting. Dahlias can be planted at any time after danger of frost is over and should blossom in from six to eight weeks. It is always best to wait until the ground becomes thoroughly warm. Locality, whether your spot is sheltered or open, earliness or lateness of the season and the time when your crop of flowers is desired, all influence planting.

Planting. Plant bulbs in hills or drills, laying them flat down, six inches deep. Do not stand the bulbs on end. If bulbs are planted flat down, six inches deep, no matter how dry the season, the bulbs will receive sufficient moisture to keep them growing. If planting with manure cover it an inch or so before planting bulbs. Fertilizer should be thoroughly worked into the soil.

Cultivation. Cultivation is the most important of all operations to insure success. Keep the soil well cultivated and free from weeds; never allow the soil to crust.

Care of Plants. Give thorough cultivation, deep at first, once a week until the plants commence to flower. Then do not cultivate as new roots are forming and you might cut off the new tubers, weakening the growth of the plant. Stir the soil after each rain to keep it from forming a crust on the surface or baking and conserving the moisture in the soil. This avoids the necessity of watering.

After the plant commences to show itself above the ground, prevent cut worms and other pests by use of vermine, arsenate of lead, cut worm killer or tobacco dust.

When plants attain a height of eight to ten inches, commence to "train" them. There are three systems: the staking system, the branching method and the massing system.

The Staking System is the most successful. Dahlias under this system should be planted from 2 to 4 feet apart. Stakes should be set when the Dahlia is planted. As soon as plants are 2 to 3 feet high they should be secured to the stakes, thus protecting them and preventing the brittle stalks from being blown over or getting broken.

Disbudding is more generally used for flowers for exhibition purposes. When wishing the largest flower possible, for exhibition purposes, you can disbudd every side shoot down the entire length of your stalk, forcing all plant life into the one flower, thus growing one flower of gigantic size. This disbudding, in addition to forcing with manure (taken up under forcing), insures you much greater success at exhibitions.

After your plant has been blossoming continually and flowers commence to grow smaller, then is the logical and proper time to fertilize. Apply any good fertilizer broadcast, or any kind of manure available, but it is better to make two moderate applications than too much at one time.

Forcing. To produce the finest flowers for exhibition purposes, plant 3 to 5 feet apart, using a liberal amount of manure or fertilizer; cultivate frequently; apply fertilizer or manure, broadcast or liquid form, at each or every other hoeing, and disbud. Nitrate of Soda proves very effective for forcing. Apply when plants are in bud, making applications often, but do not use too much at a time. Apply Nitrate of Soda in crystal form on top of the ground, or in liquid form, using one tablespoon of Nitrate of Soda crystals to a gallon of water, using sprayer or watering can.

When the flower-buds appear, only one bud should be allowed to come to maturity enabling each branch to produce one exceptionally fine, perfect flower. The flowers, for quality, must not be allowed to receive the drenching rains or scalding sun when nearing full bloom and should be protected from such.

It is always advisable to cut flowers that are to be exhibited as late as possible at night when the dew is on them, placing them in water and keeping them as cool as possible over night, thereby enabling them to withstand handling, packing and transportation.

Watering. The amount of watering depends largely upon the locality and amount of rainfall. Watering is very beneficial, adding perfection to blossoms and richness to color, but do it judiciously. A thorough soaking, with the soil stirred the following day is excellent; but a constant surface

The Branching Method. Plant in hills or rows, from 18 to 30 inches apart. When your plant has two sets of leaves, pinch off or cut out the whole top of the plant; at each leaf a branch will start, thus making four branches, one at each leaf. Do not pinch off your plant more than once, as this system makes it two weeks later in flowering; but you receive four flower stalks, each of which will blossom equal to the one stalk which you would have received had you left your plants growing without pinching. When the plant is grown it will have a short, strong, single stalk, which comes only an inch or two above the ground, with four branches of flowering stalks.

The Massing System. Plant bulbs in rows from 10 inches to 2 feet apart, according to the amount of space you have to devote. The plants are self-supporting, each plant supporting and protecting the other. At the height of 18 inches, spray occasionally with Arsenate of Lead, Black Leaf 40, Bordeaux Mixture, Hellebore, Pyrox, Slug Shot, Whale Oil Solution or other first-class solutions to kill and keep away the aphis or green fly, which often infest Dahlias. Both wood ashes and lime are good at all times, improving the condition of the soil and acting as preventative against insect pests.

To obtain the largest and most perfect flowers, only the best and largest buds should be allowed to mature, the others being taken off, enabling the full strength to develop those into exhibition blooms.

Disbudding. Some varieties of Dahlias require thinning and disbudding to produce the best flowers. Varieties having an excessive amount of foliage and small growth should have a considerable part of their branches removed, while those having more buds than can be properly developed or matured be disbudded. The operation in no way endangers the plants and anyone can do it. Thin and disbud if necessary, moderately or severely as conditions seem to require.

The Proper Way to Disbud. When the first bud is small the first set of side shoots should be removed with a sharp knife. This forces all the plant life that under ordinary conditions would have developed the first two side shoots, into the first bud, making the first flower much larger and giving it a good long stem. Removing the first set of shoots also forces ahead the second set and they in turn burst into flower.

Decorative Dahlia, Madonna

The Branching Method. Plant in hills or rows, from 18 to 30 inches apart. When your plant has two sets of leaves, pinch off or cut out the whole top of the plant; at each leaf a branch will start, thus making four branches, one at each leaf. Do not pinch off your plant more than once, as this system makes it two weeks later in flowering; but you receive four flower stalks, each of which will blossom equal to the one stalk which you would have received had you left your plants growing without pinching. When the plant is grown it will have a short, strong, single stalk, which comes only an inch or two above the ground, with four branches of flowering stalks.
First of all, select the tuber that you can think will be most easily removed. With the point of your knife, cut deeply into the base of the stalk until you leave an equal amount of the stalk-base for each tuber; and so that each tuber has its crown. By cutting deeply into the stalk-base on both sides, the stem becomes separated from the tuber, leaving a "V" shaped portion of the stalk-base as a crown or head, upon which the eye is found or will form. The next tuber favorably located from the separating standpoint can then be chosen, and removed by again cutting the stalk-base, and so on until the stalk-base becomes the crown of each individual tuber.

**Type of Bulbs.** The size of the bulb or tuber does not in any way designate the size or quality of the flower. Some varieties of Dahlias always produce very small bulbs, while other varieties make large ones. Do not consider small bulbs worthless, for they are equally as good and in many cases better than larger ones. Medium and small-sized bulbs more often produce the finest and highest colored flowers, and in many cases the best and most effective plants. Be sure that your bulb has one or two eyes or sprouts. A clump, root, bulb, or division of a clump, pot-root, cutting, sprout, and even a Dahlia seed, will grow and blossom, all equally well. It is not the size, but the care and cultivation—cultivation is the principal requirement of the Dahlias.

**Classification of Dahlias**  
As adopted by the American Dahlia Society

The Dahlia belongs to the family Compositae (or Compositae, as the family is now sometimes known) and is a close relative of our native species of cichorium and biens ("beggar-ticks") and our cultivated cosmos. What we commonly call a flower is, botanically, as also in the sunflower, a flower-cluster of headed, made up of numerous closely aggregated flowers, which are often of two or more types. One, the so-called Single Dahlia, a few outer flowers of the cluster have broad, flat, conspicuous rays or petals (popularly and sometimes three different heads or centers in catalogs of different dealers. The names and their application as recently defined by the American Dahlia Society follow:

**Single.** Open-centered flowers, small to very large, with 8 to 12 floral rays (petals) more or less in one circle, margins often decurved or revolute, (turn down or backward).

**Collarette.** Of single type, with not more than nine large floral rays, but with a circle of smaller, narrower, usually different colored, rays standing at base or in front of larger ones, and forming a collar between them and open center.

**Duplex.** Semi-double flowers; center almost exposed, opening of bud, rays more than twelve in more than one circle, long and flat, or broad and rounded, not noticeably twisted or curled. Many Dahlias previously classed as Peony-flowered belong here.

**Peony-flowered.** Flowers are semi-double, having two, three, or more rows of bracted rays or arranged rays or petals, surrounding an open center, which is usually a conspicuous golden-yellow, the outer floral rays being flat or slightly incurved, the outer rays either flat, or more or less irregular. Sometimes the rays are feathered, occasionally they curl and twist over the center.

**Decorative.** Double flowers, full to the center, early in the season at that are allowing rays, either flat, somewhat loosely arranged floral rays with broad points or rounded tips which are straight or decurved, ray-points often incurved, and with margins revolute, if rolled at all.  

**Ball Shaped, Double.** Full to the center.  

**A) Show Type.** Flowers very large, rather than broad or flat, full to the center, show-

ing regular spiral arrangement of florets, with floral rays or petals more or less quilled or with their margins involute (rolled forward or inward) and rounded tip, (Dahlias of this type with flowers spotted, variegated or parti-colored, were formerly classed as Fancy, a group no longer recognized).

(B) Hybrid Show, Giant Show or Colossal Type. Flowers fully double, broadly hemispherical to flatly globular in form, loosely built so spiral arrangement of florets is not immediately evident; floral rays broad, heavy, cupped or quilled, with rounded tips and more or less involute margins. Verging toward the Decorative Class and sometimes found classed with the Decoratives.

66. ARTHUR TWITCHETT. Color flesh or blush pink. Large, beautifully formed, in-curved flowers with splendid stems. This is an excellent variety for exhibition as well as cutting. $1.50 each

19. ATTRACTION. (Hybrid.) Large, full flower, of a clear, lilac-rose; long, strong stems, holding bloom stiff and upright. 75c each

22. AUTUMN PRINCE. A fine Dahlia of the popular Autumn shades. Reddish apricot, gold suffusion. $1.00 each

25. BALLET GIRL. This is a remarkably large, free-blooming Cactus on good stems. The ground color is orange, often tipped and marked white. A well-worthwhile variety in your garden. $1.50 each

35. BRIDAL ROBE. One of the best white Cactus. Very large, full flowers. A strong, vigorous grower and continuous bloomer. 50c each

36. BRIDE'S BOUQUET. This is a good white Cactus, an early and profuse bloomer. Flowers are of perfect form. Medium to large in size. 50c each

37. BRITANNIA. Deep salmon flesh. 25c each

42. CELIA. Rich pink. A fine, free bloomer. 35c each

48. CIGARETTE. This Dahlia resembles Nobilis, except that the color is creamy white, edged orange. Petals curve back. Good quality blooms and stems. $1.50 each

51. CLAREMONT. This variety produces a large bloom, which is always admired. Color soft peach-pink with amber suffusion. $1.50 each

52. COMRADE. Clear salmon-pink. 25c each

55. CONTRAST. Color a brilliant shade of crimson, tipped white. Very good for cut flowers... 35c each

58. COUNTESS OF LONSDALE. (Hybrid.) Deep salmon-red. One of the best. Should be in every garden. 35c each

59. COUNTRY GIRL. Large; deep golden-yellow, tipped bright amber; beautifully in-curved petals. 35c each

108. DADDY BUTLER. This is a beautiful hybrid cactus of the American Beauty rose shade or rosy carmine, reverse of petals is a lighter tint. $2.50 each

3. EL GRANADA. Color vivid orange, petals twist and interlace, showing at the tip a creamy yellow reverse. The long stem grows well out of the foliage and is absolutely stiff. El Granada produces deep flowers with closed centers from early until late season. This Bessie Boston introduction is one of our favorites and our list, you will note, covers many of this famous grower's introductions... $10.00 each

87. ETRURIA. (In-curved.) An exceptionally free-flowering, early-blooming variety. A pleasing reddish apricot shade. Moderately in-curved. 35c each

How to Keep Cut Blooms of Dahlias

Freshly-cut flowers will keep considerably longer, and wilted flowers, if not in too serious condition, will be entirely restored in appearance if the following suggestions are followed: Cut blossoms in early part of the day whenever possible. Fill receptacle with water, as hot as can be borne by one's hand. Plunge the stems, but not the foliage, almost their entire length into the water; let them remain in the water until it cools, then transfer into cold water as in usual manner, with the addition of a quarter teaspoonful of salt to a quart of water. If the stems are particularly hard and wiry, water near boiling point may be used to good advantage.

Cactus Dahlias

(1) Pompon Type. Same shape and form as A and B, but flowers must be under 2 inches in diameter.

Cactus. Double flowers.

(2) True Fluted Type. Flowers fully double, floral rays or petals long, narrow, incurved or twisted, with sharp, divided or fluted points and with margins revolute (rolled backward or outward), forming in the outer florets a more or less perfect tube for more than half the length of the ray or petal.

(B) Hybrid Cactus. Flowers fully double, floral rays (petals) short as compared with previous type; broad, flat, recurved or twisted, not sharply pointed except when tips are divided (staghorn), margins only slightly revolute, and tubes of outer florets less than half the length of the ray or petal. This type intergrades with the Decorative and Peony-flowered classes.
F. W. FELLOWS. The best orange for exhibition. Large and fine form. $1.00 each

FRANCIS LOBDELL. Mallow-pink, shading to same color. $1.00 each

HOFFNUNG. This variety produces large size blooms on splendid stems. Color intent velvety red. We found this variety to produce blooms of very fine substance, and it is a splendid keeper, therefore it is in great demand as a cut-flower variety. We are pleased to recommend this very highly. $2.00 each

KALIF (Hybrid). A majestic flower, frequently measuring over 9 inches in diameter, of perfect Hybrid Cactus form; color a beautiful pure glowing scarlet. The gigantic flowers, which are produced freely, are held erect on strong stems of wiry stiffness, making it a most effective and useful variety for cutting and garden decoration. $1.50 each

KENILWORTH. Of medium height, on branching bushes, and a free bloomer. Color, old rose with bronze suffusion. $1.00 each

KOHDINOR. Dark, rich maroon. The velvety petals are pointed. Large and deep on cane-like stems. Never forgets to bloom freely. Much superior to THE GRIZZLY. $3.50 each

KRIEMHILDE. Brilliant pink, shading to cream-white center. $3.00 each

LA FAVORITA. This Dahlia is of a long-desired color but hard to describe. Some think it is reddish salmon, while others insist it is orange, orange-salmon, or several other Autumn shades. But all agree it is lovely. $3.00 each

LOUISE SLOCOMBE. Color, rose-pink overlaid lavender. $3.00 each

MARGARET BOUCHON. A charming, bright, lively pink, tinting to flesh-pink at center; splendid form. $1.00 each

MARIPOSA. This is a perfectly formed Hybrid Cactus form; color a beautiful pure glowing scarlet. The gigantic flowers, which are produced freely, are held erect on strong stems of wiry stiffness, making it a most effective and useful variety for cutting and garden decoration... $3.00 each

JEAN CHAZOT (or Gay Paree). This is a wonderful variety and also extra fine for cutting—$3.00 each

MINAMOTO. A velvety scarlet Hybrid Cactus. The gigantic flowers, which are produced freely, are held erect on strong stems of wiry stiffness, making it a most effective and useful variety for cutting... $3.00 each

MME. ESCHENAUER. An ideal Dahlia of exceptional merit. Most pleasing and effective color—yellow at base of petals, passing to creamy white, suffused and tipped pale lilac. Delicate and chaste. $2.00 each

MME. HENRI CAYEUX (Straight). The flowers are of the largest size with long, narrow florets, measuring over 9 inches in diameter, of perfect Hybrid Cactus form; flowers very large and fine form... $3.00 each

60. CREATION (Holland Peony-flowered Dahlia). This new variety has a pleasing and unique shade not common in Dahlias—a beautiful rose-red. Flowers of medium size and produced freely upon long stems. Good cut flower sort because of substance and size of blooms. Price 50c each.

70. DIEMONT VON BYSTEIN. A popular new shade of deep blue lilac. Large and fine; a strong grower and free bloomer. Price 35c each.

75. DR. A. KUYPER. Color rich orange; a strong grower; early and free bloomer. Price 50c each.

396. EARLE WILLIAMS. This variety is always in demand. It produces immense blooms of rich, brilliant crimson and white, well distributed. The blooms are held erect, well above the foliage, on long, straight stems. Price $1.50 each.

90. F. R. AUSTIN. These beautifully colored flowers are of large size, averaging six to eight inches across. The outer petals are very long, creamy yellow, suffused, banded and shaded rich crimson; the inner petals are yellow at base, tinting lighter, and suffused pink and crimson. The plant is a strong, vigorous grower and an early and free bloomer. Price 35c each.

322. THE LION. Large flowers; bronzy old-rose suffused with yellow and salmon; free and effective. Price 50c each.

172. UNION JACK. This belongs to the list of novelties. Large, red incurved petals, tipped white. Price 75c each.

331. VATER RHEIN. This Hybrid Cactus produces blooms of good size, well above the foliage on stout stems. Color yellow, suffused with salmon-rose. Price 50c each.

333. VIOLETTA. A new color for a Hybrid Cactus—petunia-violet. Rather large blooms on good stems, but the combination of color and style is the thing. Price $5.00 each.

341. WODAN. Bold, large, but not coarse flower, frequently 7 inches in diameter. A graceful arrangement of semi-incurved petals of a pleasing delicate salmon-rose color, shading to old gold in center. Unusually free blooming variety. Price 50c each.

342. WOLFGANG VON GOETHE. Color apricot shaded carmine. Very pretty. Price $1.00 each.

349. YELLOW KING (Hybrid Cactus). One of the largest of its class. Color—yellow. Blooms are held on nice upright stems. Price 50c each.

65. DARLENE. An exquisite shade of live shell pink with a dauntly blending of white at center. The plants make an erect growth about 3 feet in height, a single plant making a very effective showing... $0.35 each
69. **DELICE.** Flowers are of good size, standing well above the foliage. A charming bright pink, suffused with lavender-pink. A well-known cut-flower variety. $0.50 each

71. **D. M. MOORE.** A rich, deep, velvety Victoria-lake, which is a shade deeper than deep maroon, the nearest approach to black. A mammoth flower produced in profusion on long, stiff stems. $0.50 each

189. **DOLLY VARDEN.** Decorative. This is a Decorative Dahlia, Iusulinde. $1.00 each

76. **DREAM.** A Holland introduction of great beauty. Color salmon and pink with amber center. $0.50 each

77. **DREEER’S YELLOW.** A beautiful Colossal Dahlia of perfect form; stems long and straight, carrying the blooms well above the foliage. The flowers average 7 to 8 inches in diameter. Color rich, sulphur-yellow. $0.50 each

78. **DE TRIVIS.** One of the largest and most beautiful Decorative Dahlias in cultivation. Blooms average 9 to 11 inches across: color is a beautiful shade of salmon-rose, suffused with old-gold, shading to a golden apricot. Fine for exhibition purposes. $0.75 each

79. **DR. TYREL.** Very large, rich bronzy golden yellow, shaded orange. $0.50 each

369. **E. D. ADAMS.** Decorative. Color golden bronze. Large blooms on good stiff stems. Flowers held well above the foliage. $0.50 each

82. **ELDORADO.** Bessie Boston, introducer of this variety, says: "A strong feature of its beauty is that the depth corresponds to the size; it has greater substance than any other variety ever seen. We have never seen a blossom of such vivid gold color."

319. **ELLINOR VANDERVEER.** Color glowing, satiny rose-pink. Blooms are of great depth and are held well above the foliage. Stem exceptionally long and stiff. We have found this to be an unusually fine bloom and of course makes it very desirable. We have no hesitancy in recommending this variety. $0.75 each

325. **GLORY OF NEW HAVEN.** This decorative produces large flowers with beautiful, broad, twisting petals. This naturally makes it unusually attractive. Color clear lavender-pink, distinctly veined deeper lavender. Blooms produced on long, stiff stems. $0.75 each

364. **GLOIRE DE STANHUIS (Decorative).** Copper color, a very pretty Autumn shade. Grows very much like a chrysanthemum, on top of stem. A Holland introduction. $1.50 each

374. **GLORY OF NEW HAVEN.** Decorative. Color apricot shading to amber. This variety produces a beautiful flower on good stem. $1.00 each

109. **GOLDEN GLOW.** Color apricot shading to amber. This variety produces a beautiful flower on good stem. $0.50 each

110. **GOLDEN WEST.** Pure yellow. The petals are deeply serrated, giving the flower a fluffy appearance which is most attractive. $0.50 each

111. **GOLDMINE.** Color pure golden-yellow. Blooms of good form, and a profuse bloomer. $0.50 each

113. **GOODBYE DELICE (Hybrid).** Clear pink, a shade lighter than Delice and has all the keeping qualities of the same but is a larger and better bloomer. $0.75 each
116. GRAND DUKE ALEXIS. White, suffused lavender; very fine. 25c each

16. HALVELLA. Color old rose pink, with a golden sheen. This is a splendid variety both for exhibition and cutting. The blooms are of great size and substance. The flowers are produced on long, stiff stems and hold their centers all through the season. $2.00 each

386. HOBBEMA. Color salmon on light yellow ground, and violet shade. Very fine variety. Holland introduction. $2.50 each

125. HORTULANUS FRIET (Wonderful Holland Decorative Dahlia). The coloring of this variety is a beautiful shade of salmon exquisitely blending to yellow at the center. 75c each

127. INSULINDE. A very fine, large flower on good stem. Petals are curled and twisted. This makes a wonderful flower for decoration. Color very deep gold with bronze suffusion. $1.50 each

129. JACK ROSE. This is a brilliant crimson-red. Is fine for the garden and for cutting. 25c each

132. JEAN KERR. One of the finest whites for decorations. 50c each

133. JEANNE CHARMET. The flowers measure from 7 to 10 inches in diameter and are borne on stiff, wiry stems frequently 18 to 24 inches long. Lilac-pink, shading to pure white toward the center, with a tinge of light yellow at the margins. 35c each

135. JERSEY'S BEAUTY. Among artists this is considered the only true pink Dahlia. Practically all pinks have tints of lavender. Large and perfect decorative type, on extra fine stems, this new Dahlia was the center of interest at all our 1924 shows. Please order early as our stock is limited. $5.00 each

136. JERSEY'S JEWEL. A nine-inch bloom on good stems. Color mallow-pink, with long petals. Has A. D. S. certificate, and is a prize-winner. 35c each

138. JERSEY'S PRIDE (Hybrid). Another large Jersey Dahlia of fine quality and style. Richly blended buff, yellow and pink, make a pleasing effect. $2.50 each

139. JERSEY'S QUEEN. Coral-pink; an extra good stand-up Dahlia. Splendid form; medium size. $2.50 each

389. JERSEY'S SOVEREIGN (Decorative). This is a new shade of color hard to describe. It is self-color and the nearest description is a salmon-orange. It is a splendid grower with dark foliage, blooms of good size and on good stiff stems. $5.00 each

149. JONKHEER BOREEL VAN HOOGELANDEN. An elegantly formed flower of gigantic size, and a rich, deep orange terra-cotta color, without doubt the finest of its color in existence. The flowers are full to the center and resemble King of the Autumn. $1.00 each

151. JUDGE MAREAN. This is a universally known exhibition variety. It is a beautiful combination of colors, almost indescribable. It is a most prolific grower and a free bloomer; of a most wonderful glowing salmon, pink, red, orange, yellow and purple-gold. $1.50 each

157. KING OF THE AUTUMN. The habit is absolutely perfect, with strong, sturdy stalks; long, stiff stems, and remarkably free flowering. The coloring is quite new and unique—buff-yellow suffused terra-cotta. 75c each

159. KITTIE DUNLAP. Color American Beauty Rose shade. Produces immense exhibition blooms. Stems are very long and every Kittle Dunlap is a prize-winner and should be in every garden. $2.00 each

160. KIWANIS. This Dahlia is of a bright canary yellow, but with a peculiar glow which gives it the appearance of a deep bed of white hot coals. Petals twist and dart like tongues of flame. $2.50 each

392. LA GRANDE JAUNE (Decorative). Color a very beautiful light yellow, and a splendid cut flower variety. A Holland introduction. $1.50 each

170. LA TOREADOR. A Judge Marean Dahlia. What more need we say except that it is crimson and keeps best of all crimsons. $1.50 each

172. LE GRAND MANITOU. Pure white, artistically striped, splashed and blotched deep violet-purple. The plants occasionally bear a solid purple colored flower. 35c each

174. LEO XIII. The habit of this plant is all that can be desired, producing large flowers upon splendid stems, well above the foliage. It is a beautiful, deep yellow. $1.00 each

387. LIBERTY (Decorative). Color peach-pink on yellow ground. Petals terra-cotta tipped. A Holland introduction. $2.50 each

180. L. K. PEACOCK. This is a vigorous grower. Flowers of good form, pure white. 50c each

182. LOTUS. This is a great favorite. Color is a luminous flame or a lively orange, intensified with metallic lustre. Blooms are produced on long, straight stems. $1.00 each
MILLIE ROGERS. Color bronzy old rose, shaded to white. The immense flower is produced on long, stout stem. We do not hesitate to recommend this variety as it is one of our favorites.

MILLIONAIRE. This mammoth new Decorative. The size is enormous but the coloring is what makes the blossoms so unique.

MARGARET MASSON (Decorative). Color beautiful, bright, clear shade of apricot buff, flowers average nine inches in diameter, and are held well above the foliage on stems four to six feet long. This is a strong, vigorous, profuse bloomer. It is claimed for Mordella, that it is the best autumn hued variety ever introduced.

MR. CROWLEY (Decorative). Of rather dwarf-bushy growth. Color bright, glowing hues of salmon-pink. Blooms are produced in great profusion. This is a very pretty variety.

Mme. Marze, which has for several years been regarded as the best white in this class.

FUTURE ORDERS

March 25, 1925.

Dear Sir:

I have received the dahlia roots, and they seem to be in good condition. I hope they will do well and perhaps next year I can order others.

Very truly yours,
MISS ALICE MEDEARIS,
Route 1, Madison, Tenn.
388. ORANGE BOVEN (Decorative). Color fine, dark orange. A Holland introduction. $2.50 each

254. ORANGE KING. It is a beautiful, glistening orange Dahlia, one of the best and the most popular color. Plant is sturdy, healthy, of medium height, branching habit, and produces the flowers freely on stiff stems. 50c each

255. OREGON BEAUTY. A seedling from William Agnew, resembling the parent in size, shape and color. Colors are large and full to the center. Color a glowing, fiery scarlet, making Oregon Beauty distinctive in every garden. 50c each

257. OSAM SHUDOW. This variety received an overwhelming vote as the most popular Dahlia in the 1918 San Francisco show. The most prominent feature of this Dahlia is its formation. The big, heavy, loose petals produce a flower more like a gigantic rose than a Dahlia. The coloring is a delightful old rose, slightly suffused with lilac and shading to yellow at the center. The bush is sturdy and tall and the main stalk is the thickest we have ever seen. The flower stem is long, thick and heavy and the blossom comes well above the attractive foliage. One bloom is a bouquet. A good producer of blossoms which are always full to the center. $2.50 each

260. PATRICK O'OMARA. Autumn shade. Claimed an improvement over King of the Autumn. $1.00 each

261. PAUL MICHAEL. Old gold. Full and deep. One of the most exquisite of the Autumn shades. A grand Dahlia. $1.00 each

265. PIERRE LECLAUD. Maroon, tipped white, fine stem. Free flowering. Its odd coloring makes this an excellent novelty. 50c each

268. PIONEER. A large Dahlia of mahogany red that is rich and showy. Blooms profusely on wiry stems. Bronze-green foliage. $3.00 each

289. POTTER (Decorative). Bright, dark violet with flaked petals. Very elegant type. A Holland introduction. $1.50 each

328. PRIDE OF CALIFORNIA (Decorative). Color crimson red with dark, full center. Immense flowers on long, stiff stems. This is a fine variety for exhibition as well as cut flowers. 50c each

394. PRIDE OF SAN FRANCISCO (Decorative). Color a brilliant, golden salmon pink. A very attractive flower, held perfectly erect on good stiff stems. This is an excellent cut flower variety. $2.50 each

257. OSAM SHUDOW. This variety received an

47. **TOM.** Small, compact flower; color bright yellow, tipped sunset red. A free bloomer.$1.00 each

353. **ZOE.** Base of petals and edges clear yellow. Tips white. This is a very attractive Dahlia and well worth having. Sometimes blossoms come all yellow. ............... $0.15 each

Single Dahlias

31. **BLUSHING BRIDE.** A variegated Dahlia of beautiful color, resembling a blushing maiden, except that the florets are of a darker shade and a more decided contrast in the coloring.$0.15 each

97. **FRINGED TWENTIETH CENTURY.** A great improvement over Twentieth Century; much larger, brighter color, while the stems are long, slender and stiff. Color bright rosy crimson, with lighter markings. Height 4 feet. ............... $0.15 each

150. **JOSEPHINE.** Flowers very large, of splendid regular form, but, unlike so many white, single Dahlias, the long, wiry stems hold the flowers erect. Strong grower. ............... $0.15 each

192. **MARGARET PERKINS.** One of the most beautiful varieties of recent introduction. The flowers are very large, have rather pointed petals, are wide, but not overlaid, and are borne on long, stiff stems. The color is pure white, with about half of each petal tipped light pink, first flower being tipped cerise pink, and like Twentieth Century, of which it is a seedling, growing steadily lighter as the season advances, becoming a clear, soft pink late. ............... $0.15 each

234. **MRS. JOSEPH LUCAS.** Rich yellow, overlaid salmon rose. The flowers are immense in size, of splendid substance, lasting a week after cutting. Medium height (4 feet) and blooms so freely as to resemble a huge bouquet. ............... $0.15 each

290. **ROSE PINK CENTURY.** The largest and best deep pink; enormous flowers on long, 3-foot stems; sure and continuous bloomer; vigorous plant. Height 5 feet. .................. $0.15 each

299. **SENSATION.** Vivid vermilion, heavily tipped white. An early and profuse bloomer. ............... $0.15 each

346. **WHITE STAR.** Flowers beautiful pure white. Plants 4 feet high, 3 feet through; enormous quantities of blooms. ............... $0.35 each

Cactus Dahlia, Mrs. Warnaar
# Special Dahlia Collections

Owing to the fact that we devote a large acreage to the growing of Dahlias, we are enabled to offer these special collections. We reserve the right to substitute when out of a variety listed, but we will do this only with a tuber of equal valuation. We pay postage on orders for Dahlia tubers. Would suggest you order by number.

Roses

The chief requirements of Roses are fairly heavy soil and ample fertilizing. Under ordinary conditions the plants succeed best in loam or clay, which has been deeply spaded and well fertilized several weeks before the planting. It is always advisable to use well-rotted manure rather than commercial fertilizers. Pruning is usually done in April, and again when the growth of the more vigorous kinds is cut back quite severely; always cut to an outside eye. Tea Roses should not be pruned until the latter part of April or until the growth has been deeply spaded and well fertilized several weeks before the planting.

Hybrid Perpetual Roses

AMERICAN BEAUTY. Deep pink and crimson; flowers intensely fragrant. Most desirable for cutting. $1.00 each; $12.00 per doz.

ANNA DE DIEBLACH (Laeharme 1859). Bright carmine red, producing large, full fragrant flowers which are very attractive. Fine bloomer and vigorous grower. $1.00 each; $9.00 per doz.

FRAU KARL DRUSCHKI. Because of the immense size of the blooms this is frequently called the "White American Beauty"; probably the best white garden Rose. $1.00 each; $12.00 per doz.

HUNG ARIA. Flowers large in good-sized trusses, freely produced. The color is a beautiful rose pink. 3½ feet..........................30c each; $3.00 per doz.

KING HUMBERT (Orchid-flowered). The most popular Canna. Great orange scarlet flowers surmount the vigorous dark bronze foliage throughout the season. 5 feet..........................15c each; $1.50 per doz.

METEOR. This is a deep red variety of robust habit. A very effective bedding plant. 5 feet..........................30c each; $3.00 per doz.

MRS. ALFRED CONARD. One of the very best Cannas in commerce today. The large, exquisitely shaded salmon pink flowers are produced in great abundance on robust, upright plants. 4 feet..........................35c each; $3.50 per doz.

ORANGE BEDDER. A particularly bright orange, with just sufficient scarlet infusion to intensify the dazzling mass of color; very free flowering. Awarded a certificate of merit by the S. A. F. and O. H. at New York. 5 feet..........................30c each; $3.00 per doz.

ROSEA GIGANTEA. This variety produces flowers in great abundance; color rich, deep rose, almost a coral carmine. 4 feet..........................35c each; $3.50 per doz.

THE PRESIDENT. When the Canna, Firebird, was introduced, its immense florets and bright red color immediately insured its popularity. The President possesses all of the good qualities of Firebird, enhanced by extraordinary vigor and perfect, healthy foliage. It grows to a height of 5 feet and produces its immense trusses of giant florets in great profusion. 30c each; $3.00 per doz.

WABASH. Very similar in size and color to Mrs. Conard, but with bronze foliage. 3½ feet..........................35c each; $3.50 per doz.

WINTZER'S COLOSSAL (Orchid-flowered). The largest flowered Canna; the florets often measure 8 inches across, and are bright scarlet. 5 feet..........................15c each; $1.50 per doz.

WYOMING (Orchid-flowered). Massive orange flowers, which make a strong contrast with the rich bronze foliage. 6 feet..........................15c each; $1.50 per doz.

YELLOW KING HUMBERT (Orchid-flowered). A sport from King Humbert, in which the foliage is green and the flowers yellow with red spots. 5 feet..........................15c each; $1.50 per doz.

DAHLIAS—FINE CONDITION

March 30, 1925.

Dear Sir:

Received the dahlia bulb in fine condition, and feel sure that I shall have wonderful success in growing it. Will follow all of your instructions. Many thanks for same. I remain,

Yours respectfully,

MRS. E. O. McCONNELL.

821 Fort Wayne Ave.,
Indianapolis, Ind.
Lilies

They are most graceful in line, brilliant in delicacy of color, and of delightful fragrance. Lilies do best in the hardy border or among shrubbery, as there they get the benefit of the shade of surrounding plants which is so necessary to their welfare.

AUGUST LILY. See Funkia.

AURATUM (Golden-banded Lily). This is one of the prettiest, if not the prettiest, of all Lilies. Flowers creamy white, spotted brown.

CANDIDUM (Madonna Lily). This variety is of easy culture, with plenty of flowers in June; very fragrant.

ISMENE CALATHIXA (Peruvian Daffodil). A fine Summer flowering bulb, producing large Amaryllis-like, pure white, fragrant flowers. Bulbs must be kept in a dry, warm place. Plant out middle of May. Bulbs must be taken up in the Fall.

LEMON LILY. See Hemerocallis.

LONGIFLORUM (Easter Lily). Not so hardy as the above varieties, and better for conservatory.

REGALE (Lilium Myriophyllum). This is known as the Royal Lily of China, and is one of the finest Garden Lilies ever introduced in America. It is claimed that this is a rival to the Jasminum in fragrance. The blooms will last for days after being cut, having wonderful substance, perfectly hardy and will thrive and do well in any rich garden loam, either partly shady or all sun. Color a beautiful creamy white, with bright golden throat, outside of flowers white, tinted yellow at the base, with delicate purple mid-ribs having three wide and three narrow petals.

SPECIOSUM ALBUM. Similar to the following, but pure white.

SPECIOSUM RUBRUM. White and deep pink. One bulb produces from eight to twelve flowers.

YELLOW DAY LILY. See Hemerocallis.

Phlox

One of the most attractive of our perennial plants. Its erect stems, topped by great clusters of small flowers, puts it in a class by itself.

For border planting, there is nothing to equal the Phlox. Their brilliant blossoms are borne in great profusion and retain their superb colorings for some time, giving color and finish to a mass planting of shrubs and brightening up the dullest places.

Prices, except where otherwise noted, 25c each; $2.50 per doz.

BOUQUET FLEURI. White, cherry red eye.

ELIZABETH CAMPBELL. Large trusses of flowers of quite a new color—light salmon, changing to pink in center. Extra.

FRAU ANTOINE BUCHNER. Undoubtedly the finest white Phlox yet introduced. Strong habit; flowers of enormous size and perfect form.

HANS VOLMULLER. A very pretty mottled variety, ground color white, delicately suffused and mottled with soft violet mauve.

JEANNE D'ARC (Syn. Pearl). White. Fine late variety.

JULES SANDEAU. Very large, flowering pure pink. Dwarf.

LA FRANCE. Light violet rose, light carmine eye; medium size.

LAMARTINE. Rich parma violet, large white center; very fine.

MRS. JENKINS. The best white Phlox on the market; splendid for massing. Comes into flower early in the season.

REINLANDER. Color beautiful salmon pink; flowers and trusses of extra large size.

R.STRUTHERS (Tall). Salmon pink with crimson eye. A grand free-blooming variety.

THOR. Color a lively shade of deep salmon pink, suffused and overlaid with a scarlet glow, ai-line red eye. This is a very popular variety.

Mexican Everblooming Single Tuberoses

This is a single, pure white variety and begins to flower in July and continues throughout the season. Wonderfully fragrant.

Mexican Everblooming, Single Tuberoses
Hardy Flowering Plants

ACHILLEA ptarmica. The Pearl. Small, white flowers, full double, borne freely through the whole season; 18 inches to 2 feet high......... 25c each; $2.50 per doz.

**Platycodon**

**Hardy Chrysanthemums**

After the frost has taken all other flowers, the Hardy Chrysanthemum greets us with an abundance of blooms of various hues and colors. It is one of the most satisfactory and popular Fall Flowering Plants. Frost will not harm the blooms, and plants are easily grown, making a fine addition to any garden. The most satisfactory way to carry the plants through the winter is by placing them in cold frames, although they can be successfully handled by planting them in a well drained position and covering with a good mulching of leaves or loose litter. The varieties listed below usually begin flowering about the last of August and continue during October and November. All of our plants are sent out of 2½-inch pots and we begin making delivery in April, continuing until July 1st. Price for good strong plants: 25c each; per doz., $2.50; per 100, $18.00

**A. RAKHAM.** Beautiful orange bronze. Early.

**ALICE HOWELL.** A beautiful shade of orange yellow. Single. Early as well as free flowering.

**ANGELO.** (Introduced by E. D. Smith & Co.). A beautiful light pink. Matures October 25th.

**BOSTON.** Strong, upright growth; clear bronze.

**CHALDRON.** Reddish crimson with gold tips. Large flower.

**CHAMPAGNE.** Bright ruby red. Wonderfully colored.

**CHAMP D'OR.** Canary yellow. Very bushy habit.

**CRANFORDIA.** Exceptionally early. Deep bronzy yellow.

**CRANFORD PINK.** Beautiful shade of light pink.

**DOROTHY.** An early snow white variety. Vigorous.

**EDEN.** A bright rose. A beauty when disbudded.

**HARVEST HOME.** Deep bronzy yellow. Excellent. 

**LA SOMME.** Deep mauve pink.

**LE PACTOLE.** Produces large bronzy yellow flowers. Strong grower.

**MRS. HARRISON CRAIG.** Yellow overlaid with orange crimson.

**NORMANDIE.** One of the earliest and best cream whites.

**VERONICA spicata** (Speedwell). Flowers in June and July. Magnificent sprays of bright blue flowers.

**Trithoma Pfitzeri** (Red Hot Poker)

Dear Sirs:

Butterfly bush and yellow rose arrived in good shape. Dahlia bulbs are starting fine.

Respectfully,

Orchid Flowered

The best of the old-fashioned or Grandiflora varieties are now quite overshadowed by this wonderful type, which is quite distinct, having large, round, open flowers of extraordinary size, usually measuring 2 inches across, with wavy standards and wide-spreading wings and a stem which is long and strong, making them of exceptional value for cutting. All the sorts offered below have been thoroughly tested and are just as easy to grow as the Grandiflora varieties.

Per packet $0.10; Oz. 40c; ¼ lb. $1.25

BARBARA. Beautiful rich orange salmon. A most brilliant color and makes a most effective bunch.
BLANCHE FERRY SPENCER. Identical in color to the popular pink-and-white Blanche Ferry; immense wavy flowers.
CONSTANCE HINTON. The most important introduction in years; of strong, vigorous growth, with enormous wavy white flowers, frequently 2½ inches across, which are borne in sprays of fours, and often fives, on long, strong stems.

Gaillardia, Basket Flower (Also See Page 26)
Peonies

Peonies are beautiful additions to any lawn or garden. They rival the rose in beauty and fragrance. Wide variety of color and type offers opportunity for many artistic effects. Peonies are unsurpassed for cut flowers as they last longer in water than any other flower. Plant them in September in loosened soil with leaf mould or cow manure mixed in. Fresh manure should never be used with the soil. In the Spring it may be spread on the ground. Protect Peonies during the colder months with about 4 inches of leaves. Our variety is wide and as complete as is to be found. We substitute only when the customer so pleases.

Lawn Grass

In making a lawn, if the soil is naturally rich, all that is necessary is that it be well spaded; making it as fine and mellow as possible. Otherwise, a good dressing of well-rotted manure should be spread in and mixed with the soil. The next requisite is good seed of the right varieties, sown at the rate of 90 to 100 pounds per acre. The morefreely the seed is used the quicker a thick, velvet-like turf may be secured.

There is no question about the quality of grass seed which is offered our customers—it is of the very best grade to be secured.

Dear Sirs:

I received iris plants, thanks for the extra you sent. I am trying to get an extra fine collection of iris. Have sent to several flower houses for iris plants, and am glad you were decidedly the best that I have received. Thank you for sending such nice plants. At sending you order for two more, please send these through as soon as possible.

Very truly yours,

MADELINE SCHAFFLER,

Gentlemen:

Just a short time ago I ordered a Lent A. Williamson Iris from you, and must take this opportunity of telling you how well pleased I am with the same. First order that I have ever received so soon. But it was such a fine plant that I put it right in the ground. Showed off to it to the best of my ability, as I told the one she bought couldn’t compare with my own. Have handled many iris, but this is the finest. While an unusual color, I can speak with knowledge when I tell you so far this fall have moved more than 600 of the German types and have about 500 blooming size seedling Japanese iris.

Very truly yours,
The new Gladioli are without an equal for bedding or borders. As a cut flower they are far superior to any other Summer bloomer, either for lasting qualities or for the various uses for which they can be employed. If planted by the last of May they will bloom by the first to the middle of August, if cared for properly.

The Way to Plant. Dig the row or bed from eight to ten inches deep, then spread a liberal amount of good fertilizer in the bottom of the row or bed, then rake it in thoroughly before planting your bulbs; but if stable dressing is used it should be spaded in when the bed is first dug over. I find that hen dressing is a very good fertilizer in the bottom of the row or bed, then covered with fully an inch of soil before the bulbs are planted. The bulbs after being planted should then be covered from four to six inches deep; just as soon as they show their heads through the ground they should then be cultivated. If this is continued once a week till they commence to flower, one will be sure of first-class results.

ADELINE KENT. Color delicate light rose pink, heavily ruffled from edges to center. Throat straw color with ruby dashes. Flowers are large, on fine long spikes. $1.00 each; $10.00 per doz.

ALBANIA. Pure silvery white edge of petals daintily ruffled; faint pink markings on the tips of petals. This is a very healthy, vigorous grower. 75c each; $7.50 per doz.

ALICE TIPLADY. This is considered the very best of the Primulins on account of the large size and delicate color which is a beautiful rich orange saffron. $1.50 each; $15.00 per doz.

AMERICA. Conceded to be one of the finest varieties for cutting or bedding; color a beautiful soft flesh pink, orchid-like in its coloring and texture. 10c each; $1.00 per doz.

ANNA EBERIUS. Color dark, velvety purple; throat deeper color with peach-blossom pink; lower petals striped carmine red. $1.50 each; $15.00 per doz.

BERKSHIRE. Delicate pink. 20c each; $2.00 per doz.

BREACHLEYENSIS. Color vermilion-scarlet; very fine. 10c each; $1.00 per doz.; $7.00 per 100

Hardy Vines and Climbers

**AMPELOPSIS (Ivy).** Veitchi. Self climber. Very well known. Best of all deciduous vines for clinging to walls. Good strong plants, 75c each.

**BIGNONIA radicans (Common Scarlet Trumpet Vine).** Strong plants, 75c each.

**CELASTRUS scandens (American Bittersweet).** The scarlet fruit pods are very handsome and showy. Good for covering banks and slopes when creating natural effects. Strong plants, 75c each.

**CEMATIS paniculata.** White, sweet-scented Clematis. A very popular Summer-flowering vine. Blossoms are borne in profusion in July and August, followed by feathery seed. Strong plants, 50c and 75c each.

**DOLICHOS.** The wonderful Japanese Kudzu Vine. This is the fastest growing vine that anyone knows about, when well established, making 12 and 14 inches a day. The rosy purple pea-shaped flowers are borne in racemes in August. Good strong plants, 75c each.

**EUONYMUS radicans vegetus (Evergreen Bittersweet).** So called because of its masses of red berries hanging to the vines in Winter time. A most strikingly pretty decoration on walls or trees. Strong plants, 50c and 75c each.

**HEDEMA (English Ivy).** Very attractive effects are possible with this glossy, green-leaved vine, with its foliage remaining Summer and Winter. 15c each; 6 for 75c; $1.00 per doz.

**LATHRUS (Hardy Sweet Pea).** A most desirable, hardy climbing Polygonum Auberti plant with dense clusters of large, pea-shaped flowers in shades of white and pink. Strong plants, 50c each.

**LYCIUM (Matrimony Vine).** Produces grand display in the Fall with its scarlet berries. Excellent for covering banks. Strong plants, 50c each.

**LONICERA (Honeysuckle Vine).** Halliana. The rapid growing Japanese Honeysuckle. Beautiful light green foliage and many creamy white, fragrant blossoms all Summer. Strong plants, 50c each.

**LYCUM (Matrimony Vine).** Produces grand display in the Fall with its scarlet berries. Excellent for covering banks. Strong plants, 50c each.

**POLYGONUM Auberti (Silver Lace Vine).** It is perfectly hardy, of strong, vigorous growth, attaining a height of twenty-five or more feet, producing during the Summer and Fall great, foamy sprays of white flowers, and a well-established plant. During its long period of flowering is a great mass of bloom. Strong plants, $1.00 each.

**WISTERIA.** Lilac purple. When well grown and producing a good crop of bloom the Wisteria is a very beautiful vine. It is especially desirable for trellises, pergolas and for covering old tree trunks. Strong plants, $1.00 each.

HOW TO ORDER. Use our order blank. Please write plainly your name, post office address and state. Always list us how you want the goods you shipped. Name your express or freight station. Do not write regular letters on our order blanks. Write them separately. Always glad to know just what you have in mind. Perhaps we can help you determine what is the wisest course to pursue. Note: When ordering Dahlias, always give number as well as name of the variety.

ORDER EARLY. All orders received by us are filled in rotation. Ordering early will insure the reservation of varieties that later may be sold out and save you disappointment. We do not substitute unless authorized to do so.

TIME OF SHIPPING. Unless you give a specific shipping date, your order will be shipped to arrive at the proper time to plant in your locality. If you wish your order shipped at any special time, please so advise us.

HOW WE SHIP. We prefer shipping by express, customer to pay the charges. If you prefer sending by parcel post, postage to cover parcel post charges must be included in your remittance. Shrubs, evergreens, perennials and rose plants we will ship by express collect, unless you direct us otherwise and include postage. On dahlia bulbs we prepay the express collect, unless you direct us otherwise and must be included in your remittance. Shrubs, evergreens, perennials and rose plants we will ship by customer to pay the charges. If you prefer sending please so advise us.

OUR GUARANTEE. We guarantee all nursery stock furnished by us to be first class and true to name. We exercise the greatest of care to have all of our trees, plants and shrubs true to name. We do not substitute stock furnished by us to be first class and true to name, well grown, packed in the very best possible manner and immediately upon receipt of stock. No complaints will be entertained that are not made immediately upon receipt of stock.

ACCURACY OF DESCRIPTION. All descriptions and other matter in this catalog will be found as nearly in accordance with actual facts as is humanly possible to write them. Great care has been taken to avoid exaggeration in descriptions of varieties. The varieties you select are always sent, unless you grant permission to substitute. If you wish a particular color rather than a particular variety, many times it is to your advantage to mention the fact as we may oftentimes improve upon your selections, or to advise them as to the proper methods of planting and culture. It is the human interest in business that adds greatly to its satisfaction. We want your order, but we are just as much concerned about your success in producing to your order as in the growth of our business. It is the human interest in business that adds greatly to its satisfaction.
